

Newest addition to the original Isolator series

Isolation never sounded so good.

mk earphones are the newest addition to Etymotic's high-fidelity Isolator earphone series. Featuring Etymotic's renowned sound quality and high noise isolation.

Isolator earphones are a great choice for today's active lifestyles. They tune out the world around you, so you can hear every detail in your music. These low-profile, in-ear earphones fit comfortably with hats and helmets. Ideal for commuting, travel and sports activities.

Model:
mk5

ACCU Technology®

The ACCU•Chamber® acts as a 3-band equalizer to enhance response accuracy and refine mid-range and high-frequency sound quality.

WHY ETYMOTIC?

Etymotic designs products to measure, improve and protect hearing and enhance the listening experience of music lovers everywhere. Etymotic's engineering team is led by founder Dr. Mead Killion, an audiologist, engineer, inventor and jazz musician. Together, audio engineers, musicians and audiologists at Etymotic have generated over 100 patents issued and pending. Etymotic has the distinction of being the first company to develop and patent noise-isolating, high fidelity in-ear earphones.

✓ BEST SOUND ACCURACY

True high fidelity requires reproduced sound to be as close as possible to the sound of a live performance. Etymotic's earphones and headsets have the highest response accuracy of all in-ear earphones and headsets. Etymotic is the only company that publishes accuracy scores.

✓ BEST NOISE ISOLATION

Etymotic's earphones have the highest noise isolation of all earphones, as measured by an independent laboratory accredited by the National Institute of Standards and Technology. Reduction of outside noise lowers the risk of listening at unsafe levels.

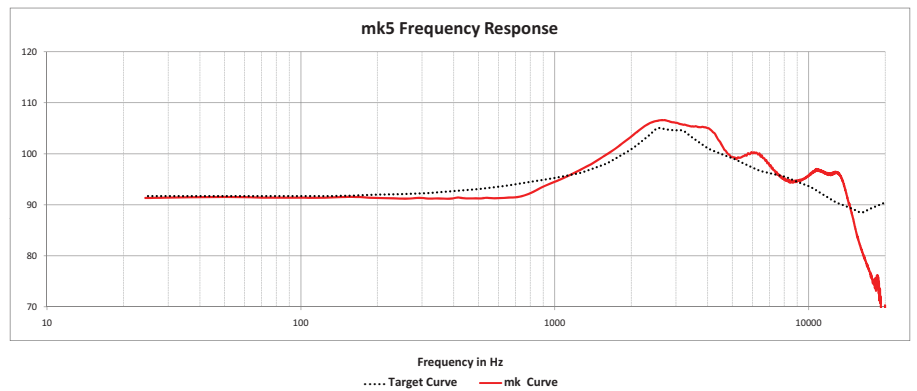

✓ BEST STYLE AND FIT

All Etymotic earphones include an assortment of noise-isolating ACCU•Fit™ eartip options to ensure proper seal and comfort.

CUSTOM•FIT upgrade option is available for all earphones and headsets. Custom earmolds bring an entirely new level of comfort during extended listening, exercise and travel. Molds are exact replicas of the ears, ensuring the same professional fit preferred by musicians and sound engineers for consistent sound quality and noise isolation.

WARRANTY: 1 year
